PROFILE

Starting out as a Systems Administrator 20 some odd years ago, I made my way towards backend development and eventually frontend development where, in comparison, is what I enjoy the most. I am self-taught and love learning new languages to help companies achieve their goals. Currently, I am teaching myself to code iOS apps in Xcode/Swift. To give my brain a break from coding, I enjoy photography, drawing and traveling.

EXPERIENCE

WEB CONSULTANT AND DEVELOPER

Marvin Yan Web Consulting, 07/2016 - Present

Provide web and programming consultation services from frontend design and UI/UX components to backend design and database architecture. Develop and code based off of consultation. Implement and translate PSD comps to web code. Apply any responsive and adaptive design principles. Work with backend CMS systems including Drupal and WordPress.

SENIOR FRONTEND WEB DEVELOPER

Hallmark - Spiritclips, 05/2015 - 07/2016

Implemented and translated PSD comps and wireframes into semantically correct web templates. Applied responsive and adaptive design principles. Coded necessary middle and sometimes backend requirements necessary for frontend.

FRONTEND WEB DEVELOPER

Starkey Hearing Foundation, 10/2014 - 12/2014

Short-term contract to help launch their website ListenCarefully.org. Helped with implementing frontend design and development on a WordPress CMS system. Aided with searching, installing and customizing WordPress plugins. Helped with bug discovery and fixing.

FULL STACK WEB DEVELOPER

Oversee.net, 07/2008 - 07/2014

Produced both internal-facing and external-facing websites based off of designs from Photoshop PSD files. Developed and designed database architecture. Maintained and updated working integrity of current scripts and programs. Developed, maintained, and updated custom CMS systems.
